

b2
This application relates to the following applications U.S. Ser. No. 603,368, entitled "Virtual Patient Hot Spots", filed June 26, 2000; U.S. Ser. No. 603,604, entitled "Web Simulator", filed June 26, 2000; U.S. Ser. No. 603,045, entitled "Patient Simulator", filed June 26, 2000.

In the claims:

Please amend claims 1, 3, 5, 6, 8 and 10 as follows:

SUB D1
b3
--1. (Once Amended) A method of displaying a video image of at least a portion of a virtual patient, the method comprising:
accessing identification of a video file, the video file comprising a series of video images that depicts virtual patient features over a range of said features;
determining an offset into the video file, the offset corresponding to one of the series of video images; and
presenting the one of the series of video images corresponding to the offset.

SUB D1
b3
3. (Once Amended) The method of claim 1, wherein the virtual patient features comprise at least one of the following: age and weight.

SUB D1
b5
5. (Once Amended) The method of claim 1, wherein the video image comprises a video that morphs an image of a virtual patient from slim to heavysset.

SUB D1
b5
6. (Once Amended) A computer program product, disposed on a computer readable medium, for displaying a video image of at least a portion of a virtual patient, the program including instructions for causing a processor to:
access identification of a video file, the video file comprising a series of video images that depicts virtual patient features over a range of said features;
determine an offset into the video file, the offset corresponding to one of the series of video images; and
present the one of the series of video images corresponding to the offset.
